

What Senses Do Animals Have?

By Bobbie Kalman

Crabtree Publishing Co, Canada. Paperback. Book Condition: new. BRAND NEW, What Senses Do Animals Have?, Bobbie Kalman, This title is suitable for children of ages 7 to 9 years. Did you know that worker bees have more than 5,000 lenses in each eye and dragonflies have more than 30,000? Did you know a chameleon can move each of its eyes in opposite directions? This fascinating book will thrill children with facts, such as how crickets hear with their legs, how bats and dolphins use echolocation, how elephants hear low-frequency sounds, and how sharks use their lateral line for sensing movement in water. Other topics of this title include animals that can sense ultraviolet and infrared light, temperature changes, and smells, and those that are able to detect magnetic fields. This book, illustrated with magnificent photographs, is more interesting than a science-fiction novel!.

Reviews

An exceptional pdf and the typeface utilized was fascinating to read through. It can be written in straightforward words and phrases instead of confusing. I am just quickly could possibly get a delight of looking at a written ebook.

-- Prof. Arlie Bogan

It is in a single of the best books. This is for those who state there had not been a well worth reading through. Once you begin to read the book, it is extremely difficult to leave it before concluding.
