RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 36 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1995-10-01 Excerpt: . . . the Campbell spray booth involves the use of air curtains; the worker stands outside of the booth and sprays through the air curtain. The air curtain provides a barrier between the worker and the solvent emissions inside the booth resulting from coating the piece. A pilot system has been built, and a full-scale system has been designed. Mobile Zones Associates has developed a device which, when installed on a spray booth, enables the worker(s) to spray coatings from a partially enclosed mobile work platform. The worker stands inside a cab, the movement of which is controlled from inside the cab by the worker. Within the Mobile Zone cab, fresh ventilating air passes across the painter from an open moving window at his rear. The remaining section of the mobile work platform is ventilated using recirculated air. The Mobile Zone design contrasts with a conventional spray booth, in which the entire length of the booth is supplied with fresh ventilating air. Ultraviolet (UV)-curable coatings are frequently used by flatline furniture coating operations. Since the pieces are flat, curing in a conventional UV-cure oven is straightforward. Although UVcurable coatings are also applied to case goods (nonflat pieces), the UV-curing process with such pieces is more difficult. In order for a UV-curable coating to cure, all coating must be exposed to the UVlight. The lamps in the UV-oven must be situated to ensure exposure to all areas of the case goods, including recessed areas, carvings, etc. The UV-lamp locations...
